200L Paper IBC | 1000L Paper IBC | **1L Tetra**

NEW

CREAMED **Coconut**

Creamed Coconut is made of unsweetened dehydrated fresh meat of mature coconuts that is ground into a semi-solid white cream totally without additives. It has a delightful coconut fragrance and rich flavour.

Packaging Options

20kg BIB | 5kg BIB

Desiccated
Coconut Chips

Made from handpicked coconuts and meticulously toasted to perfection, our Coconut Chips are a testament to quality and taste. Their natural sweetness and delicate crunch make them a versatile and elegant addition to any occasion.

Available Flavours:

Natural, Full Toasted, Half Toasted, Sweetened, Salted, Sweet & Salt, Kithul Palm Syrup Coated or as per requirement.

Desiccated Coconut

Shredded and dehydrated white meat of matured coconuts with great natural aroma, containing no refined sugars or artificial flavours, additives or sweeteners.
Available in a variety of sizes as fine, medium, chips and other grades.

Fresh Grated Coconut

This product is made from hygienically grated kernels of Sri Lankan coconut. Each matured, high-quality coconut is handpicked by experts. They are then deshelled, peeled, washed, blanched, and then grated mechanically into fine particles before being frozen to ensure maximum freshness on delivery.

Coconut Water

A clear liquid found inside the coconut, that is extracted from fresh, curated, matured and paired coconuts. Our products are manufactured
using the latest UHT technology understringent quality assurance systems and aseptically packed to preserve freshness.

Our Roadmap to become Net Zero

By 2050,

NET ZERO

By 2035,
Emission reduction by

50%

By 2027,
Emission reduction by

20%

- Optimize Energy Consumption
- Reduce Water Usage
- Source of Key Raw Material From Regenerative Agricultural Farms
- Employee Transport Pooling
- Finish Ggoods Transport Optimization
- Renewable Energy
- Decrease Chemical Consumption
- Forklift Conversion to Electric
- Conversion of Fossil Fuel to Biomass in Boilers
- Plant Trees

Our Net Zero Project, a bold initiative to reduce our 2023 carbon emissions of 1081.59 tonnes of CO_2 and lead the way toward a greener, climate-conscious future.

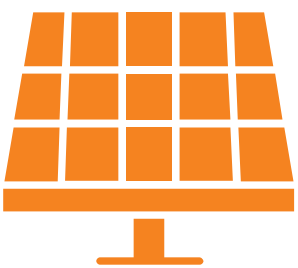

2027

KAP's Sustainability Goals

Compensate

40%

of electricity requirement through solar power energy by year 2027

Plant

50,000

trees by the year 2027

The e-conversion initiative at Kandetiya Agro Products represents our commitment to a sustainable future by transitioning to solar power, with the goal of meeting 40% of our electricity needs through renewable energy by 2027. This shift reduces our carbon footprint, ensures reliable and cost-effective energy for uninterrupted production of high-quality coconut products, and sets an example for the community. By embracing renewable energy, we are not only enhancing our operational efficiency and environmental responsibility but also driving innovation and inspiring others to join us in creating a greener, more sustainable world.

25,000+

Trees planted so far.

Regenerative

Agricultural Practices

50%
of KAP Plantations practice regenerative agricultural practices.

100%
of KAP Plantations will be adopting regenerative agricultural practices by 2027

In all our plantations, we avoid tillage to keep the soil healthy, retain water, and prevent erosion and carbon loss. We cover the land with crops like Puraria, Mucuna spp., Centrosema, and Gliricidia, which improve soil, control pests, and reduce weeds. Cattle grazing is done in rotation, allowing their manure to enrich the soil while giving the land time to recover. Since our farms are USDA/EU organic, we don't use synthetic fertilizers or pesticides, but instead rely on traditional methods to keep the soil fertile and pests under control. We also use compost and bury coconut husks to improve soil health and hold moisture. Lastly, we harvest rainwater with small lakes to water the land and keep the soil moist during dry seasons.

“SHILPABHISHEKA”

The Celebration of Skills

“Shilpabhisheka” is a special CSR Project which focuses on investing in the future by enhancing education for rural schools and students in Sri Lanka. We believe education is key to empowering young people to reach their full potential and contribute to society.

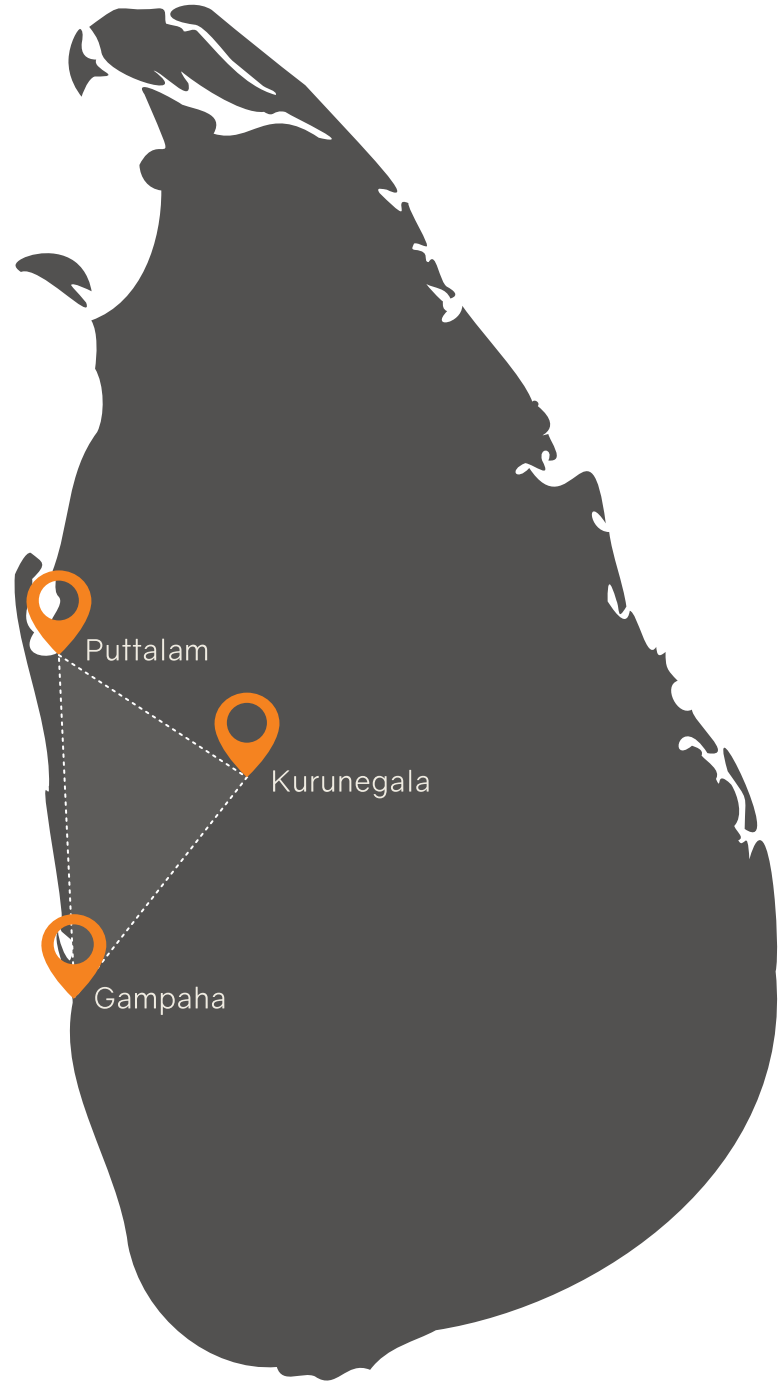

Our vision is that education is the key for a brighter future. By equipping school children with the right knowledge, skills, and attitudes, we can help them become well-rounded individuals who contribute positively to the economy. We aim to bridge the resource and knowledge gap between rural and urban schools, supporting socially and economically disadvantaged students to compete effectively with their urban counterparts.

Feedback

An Executive Chef, European Restaurant Chain
"KAP coconut milk is full of flavour and gives our curries a creamy, authentic taste. Always consistent and reliable in the kitchen."

Alternative Diary Products Manufacturer, Canada
"One of the key features we value is the stability the manufacturer has been able to achieve. The cream has no issues of being stored at room temperature. Also, it has a very good shelf-life which has made it very easier for us to plan the operations."

Ice Cream Manufacturer, US
"The viscosity of the cream is highly commendable. It is consistent throughout the batch, as well as the texture."

Alternative Dairy Products Manufacturer, UK
"What really sets KAP apart is that they manage everything themselves from the coconut plantations to production and even transportation. For us in the UK, it's rare to find such an integrated and sustainable supply chain, and it makes a big difference in the quality and reliability of the coconut milk and cream we receive."

Yoghurt Manufacturer, Netherlands
"The Coconut Cream produced by Kandetiya, has a unique quality of its own, something we've not seen from other suppliers. It has the perfect aroma and texture for secondary manufacturing processes."

Confectionary Products Manufacturer, France

"With KAP it is not only about supply. They share with us technical advice that really helps us to develop our confectionery recipes. This kind of support is not so common, and we appreciate it a lot."

Juice Manufacturer, UAE

"When we faced a sudden shortage of coconut milk and couldn't find supply anywhere else, KAP stepped in and delivered our urgent orders without delay. Their support kept our production running when it mattered most."

Alternative Dairy Products Trader, Germany

"We are extremely satisfied with the consistency and reliability of supply. Yara has maintained a 100% service level on both organic and conventional coconut milk and cream, ensuring our customers receive their products on time without interruption."

Alternative Dairy Products Manufacturer, Australia

"A highly recommendable manufacturer of high-quality coconut milk."
